

I benefit from listening to XM Satellite Radio and its traffic and weather channels. They provides variety and quality that are not available elsewhere. They have up to the minute traffic and weather reports that are broadcast more often, and more local. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
